

PROFESSIONAL REFERENCES

Terrance O'Shea

Vice President of Engineering, Squire Solutions
Fellow & Vice President for Wearables & Smart Systems, Hewlett Packard (2016)
Honolulu, HI
(808) 343-5151
terry.oshea@me.com

Terrance was my first manager out of college and personally recruited me from the University of Washington. He began my project's creation and incubation from academia into commercial opportunity, guiding and mentoring me through the process both domestically and abroad. Terry continues to provide mentorship both professionally and personally.

Tomm Aldridge

Consultant & Founder, ErgSense
Director, Energy Research & IoT Acceleration, Intel (retired)
Olympia, WA 98502
(360) 528-9717
tomm@ergsense.com

I grew acquaintance with Tomm in Intel Labs. I have worked with Tomm previously, in Ergsense, delivering successful embedded firmware results. We spend time exploring and investigating new embedded technology opportunities (e.g. Industrial Sensor opportunities, embedded radio system architectures, etc.)

Craig Bedward

Owner & President, S5 Solutions
Mukilteo, WA 98275
(425) 232-6277
craig.bedward@s5solutions.com

I worked with Craig in test systems design & development for the medical cooling apparatus of an active client. The client's vaccine cooler needed remote confirmation of operation on delivery, with periodic regression to qualify for use and I developed a solution to achieve this. Several subsystems were involved including sensing, actuation, user interfaces and report generation.
