

Brief

Using the index.html iframe requires accurate resizing to avoid dual scrolbars

Details

Has been clunky & inconsistent there are lots of options, and pages

Desktop

iFrame Pages	Load to page	Refresh	Cycle from not home	Cycle from home	load wit '?' query
home.html	PASS				
embedded.html	FAIL				
software.html	LONG				
proto.html	FAIL		<OPEN>		
util.html	LONG				
sandbox.html	LONG				
portfolio.html	LONG				
dev.html	LONG				
contact.php	FAIL				

Mobile

iFrame Pages	Load to page	Refresh	Cycle from not home	Cycle from home	load wit '?' query
home.html					
embedded.html					
software.html					
proto.html					
util.html			<OPEN>		
sandbox.html					
portfolio.html					
dev.html					
contact.php					

Test Record

#5C78

Dev Notes

-

Features [Fn]

- A2 Stays the same

Else

Ignore

Test Vectors

1. From idle S1->S2->S2
first slide, then no more logo updates
*currently H->E->E works fine
*H->S->S works fine
*H->E->S is not
logo moves farther right

then F5)
then F5)
e

ht & gets bigger? Do console prints to check
